Centralized Desktop Consolidation using Virtualization on Servers

2004-07-23

IPCOM000030030D

English

This Article discusses the problem of current desktop implementation and a possible solution consolidate. Many existing desktop implementations are more or less FAT client for servers where one of them is the high integration of multiple applications required to ...

Result # 5 Relevance:

Disk Drive with Embedded Hyper-Text Markup Language Server

1995-12-01

IPCOM000117109D

English

The widespread availability of viewers known as "Web Browsers" for the standard Hyper Text Language (HTML) allows the creation of interactive user interfaces that are platform independent. This ability has spawned the explosive growth of the ...

Multi Web Screen for Intranet User

2001-06-01

IPCOM000014013D

English

Highlight This invention enables a user to use plural applications on different platform: screen on PC at a time , where Web technology is being used . This would be mainly fo users within company . Now

Result # 8 Relevance: 

Autonomic self-updating software agent

2003-10-13

IPCOM000019945D

English

The autonomic self-updating software agent continuously gathers information about wh applications are being accessed by users on a computer system, and then searches for recommend and/or download and install. The autonomic software agent covers a full ra

Result # 9 Relevance: 

Method and System of Avoiding Duplicated Software Installation in a and Shareble Computing Environment

2007-05-07

IPCOM000152566D

English

Described is an invention for virtualizing software such that a single installation support running instances in a distributed environment without the need for local installation.

Result # 10 Relevance: 

Browser with plug-in for home network control, and applications ther

08-Aug-2002

IPCOM000009131D

English

n the home network world, the user is able to interconnect all his home devices to inter all of them. The user is then able to control all his devices from one of them. Even if in chapters IEEE 1394 and HAVi stack are used in the different ...

Search The multiple simultaneous concurrent tasks support on web-based console pr query: CCDSVM to be operated like a single machine. The combined software module actually formed a model of web-based computer user work environment, whic generic operating system, for either a single system or a group of system. To tasks support on web-console for CCDSVM, the control management station sl supporting software modules and web server software, the console host shall and the system units shall has service software modules. The console support modules shall include a user space task list to store all tasks initiated by users consoles. These software modules of this invention, which may be implement programming languages and applies various communication protocols, on diffi be capable to communicate with each other through either network links in In or LAN environment or through inter-process communication mechanism on n addition, console supporting software needs to obtain associated conventional conventional locks for each tasks and properly release these acquired locks on order during each tasks executing up to the point when the tasks are finished. that multiple simultaneous concurrent system tasks and operations will be exe interfering or blocking each other and without any delay. All methods and prin tasks support through we-console for CCDSVM also can be applied to a non-w networked console in CCDSVM environment. The implementation of Web-cons CCDSVM actually created a unified computer user work environment to allow i operating their computer systems through a web browser either locally or rem the net.
